Environment Policy

Introduction.

Our environmental policy sets out how we intend to implement environmental, social, and governance (ESG) best practices internally to promote corporate resiliency and sustainability.

This is controlled by the implementation of an integrated management system (IMS) that is established to comply with the International Standard ISO 14001:2015. This enables Forza Doors to promote a culture of environmental consideration in all company systems and procedures under the direction of the senior management team with the support of all employees and supply chain partners, to prepare for and manage the ongoing challenges posed by emerging and long-term risks.

We believe our business must aim to operate with environmental goals and economic health in harmony. Minimising the use of resources and environmental impact, including the prevention of pollution.

Our Environmental Policy sets out our approach to managing and reducing our corporate environmental impact.

Management Commitment

The Directors, management, and staff of Forza Doors recognise that our business activities must be characterised by an active commitment to the environment, an ongoing process of improvement and compliance with all relevant environmental legislation at local, regional, and national level as well as any other compliance obligations.

This policy will be reviewed annually to ensure that it genuinely and accurately reflects Forza Doors business at any given time.

Environmental Protection

We understand our environmental impact and have set a range of controls to ensure our operations are responsibly managed and continue to work to reduce the risk of adversely impacting the environment, biodiversity, and ecosystems. Forza Doors is committed to the protection of the environment, including the prevention of air, water, or land pollution, and will strive to promote efficient operations.

Environmental Objectives

Forza Doors sets long-term environmental goals to improve our performance and reduce our carbon emissions. We will adopt achievable objectives and create action plans for their completion in relation to our environmental impact. We strive to:

- Achieve net-zero carbon emissions by 2050 covering all scopes 1,2 and 3 carbon emissions. In line with our purpose to contribute to a safe and liveable world, we recognise that companies play a significant role in the reduction of global Green House Gas emissions.
- Drive efficiencies within operations including energy efficient design and operation of our buildings.
- Encourage our landlords to improve the environmental performance of the buildings we occupy.
- Purchase renewable electricity wherever feasible.
- Promote sustainable travel options where applicable.
- Evaluate and monitor our supply chain and encourage sustainable consumption.
- Procure services and goods that are environmentally, socially, and economically responsible, and sustainable.
- Create and operate a management planning process to prevent environmental accidents and to minimise the use of substances, materials and chemicals which can be hazardous to people or the environment.
- Create and facilitate an open dialogue with staff, suppliers and stakeholders on environmental issues and embrace their ideas.
- Develop and improve the environmental skills and knowledge of our staff by providing information and training.
- Use a life cycle approach to adapt production processes and product development to reduce current and long-term environmental impact.

- Plan the transportation of our goods in the most efficient manner to lessen our impact on the environment.
- Maintain the FORS silver accreditation, actively implementing best practices to reduce transport-related environmental impacts through fuel efficiency, noise reduction and vehicle optimisation.
- Monitor and minimise our energy and water environmental performance with clear objectives to improve performance.
- Minimise waste generation and apply responsible waste management and disposal techniques.
- Promote and support the FSC (Forest Stewardship Council) chain of custody scheme through our assessment by Interface NRM.

Continual Improvement

Forza Doors will constantly seek ways to improve our environmental performance, promote the use of sustainable resources and best practices and identify ways to reduce the impact of our operations to the environment. We will continue to collaborate with our clients, suppliers, colleagues, and communities to improve resilience and sustainability.

Will Hunnam

Managing Director
